Hegira Musyafa Kartiwan

UI/UX & Logo Designer

About Me

As a student majoring in Information Systems and Network Applications (SIJA) at SMK Bina Putera Nusantara, I am a 12th grade student who is committed to developing myself in the digital world precisely in design. My main focus at the moment is UI/UX and Logo Design, where I continue to improve my skills in these areas. In addition, my love for the world of design is not limited to that, I also studied the world of mobile developers, precisely on the front-end. During my educational journey since middle school, I also gained consistent knowledge in design, ensuring that I have a strong foundation in aesthetics and beauty to create beautiful designs.

Experience

Library Project
2022 - 2023

This project is called Vidiktif, starting from me thinking about creating a literacy movement, I then invited 3 of my friends to form a team to create a web-based library platform, and I was chosen as a designer to manage the UI/UX of this platform, the four of us as founders formed a larger team of volunteers, in the end there were about 20 people, this project was supported by the principal and foundation of our SMK, but unfortunately this project had to stop because of funding problems that came and went.

All My Project
2023 - Now

I currently have various projects, such as a YouTube channel, creating a design agency, creating self-projects with friends, etc.

Education
